

Sharelog dashboard

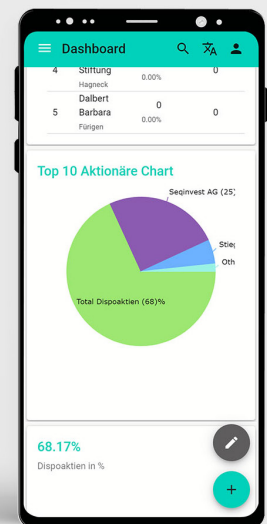

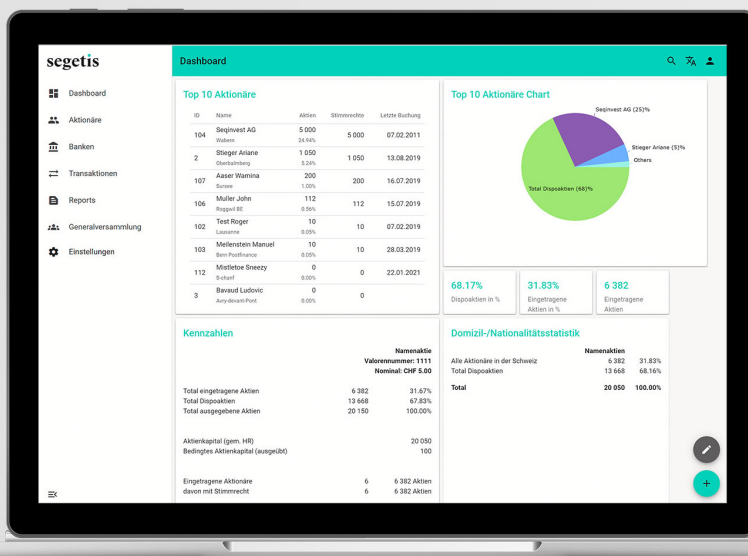

The web-based solution for evaluations and analyses in your share register

The Sharelog Dashboard systematically collects shareholder information, evaluates it and presents it clearly. This means you have an overview at all times and can make decisions quickly. Internet access is all you need. All data is transmitted with secure end-to-end encryption.

Sharelog Alert service

We know which information is important for you and your company. Relevant changes in the shareholder base are notified to you immediately. Our smart Sharelog Alert service provides important real-time data on major share transactions or shifts in the shareholder base directly to your e-mail inbox. These alerts give you the opportunity to be constantly informed about important developments in the share register and be one step ahead of critical events.

Secure access with an established Secure Access Hub

Clear evaluation

The reporting offers you a multitude of ready-made standard evaluations at the push of a button. They are divided into the areas of Management Summary, Transactions, Movements and Transfers. All reports can be automatically created and

saved as PDF or Excel files. It's possible to adapt existing reports at any time using Crystal Reports. That's why systematic evaluation of shareholder data is also an important part of our service.
